At GEMCO Medical, we strive to **_"Help You Help Your Customers"_**, by providing assistance in the selection of quality, dependable medical products and excellent customer service to help you supply the diabetes and durable medical equipment products that your customers need.

Founded in 1992, GEMCO Medical has been in the healthcare distribution business for more than 20 years. Our experience allows us to share invaluable industry insight and product knowledge with you and other third parties.

GEMCO Medical was a pioneer in the diabetes supply industry. We were the first to partner with a diabetes manufacturer to design a Medicare and Medicaid diabetes program geared to the Medicare provider market. These programs maximize your profits on diabetes products that are billed to Medicare and Medicaid.

Today, GEMCO Medical's Medicare, Medicaid and Medical Benefit diabetes program has expanded to include all major diabetes manufacturers. In addition to diabetes supplies, GEMCO Medical also has you covered for your durable medical equipment needs. GEMCO Medical is an authorized distributor for: Abbott Diabetes Care, Agamatrix, Animas Corporation®, Arkray USA, Bayer Healthcare, BD, BioSense Medical Devices, Cara, Covidien, Drive, GemCare™, Insulet, LifeScan, Medtronic, Nipro Diagnostics, Oak Tree International Holdings, Inc., Owen Mumford, Pharma Supply, Prodigy, Roche Diagnostics, Roscoe Medical, Sanvita, Simple Diagnostics, Smiths Medical, Specialty Medical, SteriLance Medical, Steris, Ultimed™, and more.

As we grow, we have stayed true to our roots as a customer-centric company, focusing on providing value-added services and being flexible in an ever changing market. As a result, we have recently expanded our product offerings to include more retail-friendly cash items and aids to daily living products.

As the years progress, GEMCO Medical continues to make every effort to find new ways to **_"Help You Help Your Customers"._**

ORDERING INFORMATION

For your convenience, GEMCO Medical offers a variety of methods to place an order:

1. PHONE: 1-800-733-7976. Our Customer Service Representatives are available to assist you from 8:30 a.m. to 5:00 p.m. EST (Eastern Standard Time) Monday through Friday.

2. FAX: 1-330-342-9444 / 1-330-342-9445

3. WEBSITE: www.gemcomedical.com (Available 24/7)

4. E-MAIL: orders@gemcomedical.com

5. E.D.I.:   Electronic data interchange is available. Please contact your sales representative for details.

6. MAIL: GEMCO Medical
             5640 Hudson Industrial Parkway
             P.O. Box 429
             Hudson, OH 44236

• To ensure prompt processing, please include the following information when placing orders:
   - Account Number
   - Billing and Shipping Addresses (if different)
   - Purchase Order Number (if applicable)
   - Your Name and Phone Number
   - Product Number, Description, and Quantity

• Minimum Order Requirements:
   - GEMCO Medical does not have a minimum order requirement. No order is too small or too large.

PAYMENT INFORMATION

GEMCO Medical offers a variety of payment options listed below:

1. OPEN ACCOUNT: Open account status is determined by a customer application, signed account agreement, and completed commercial credit inquiry. Standard terms of sale are Net 30 days from the invoice date. Credit applications are available through your sales or customer service representative or online at www.gemcomedical.com.

2. CREDIT CARD PURCHASES: We accept VISA, MasterCard, DISCOVER, and American Express. There is no service fee if paid at the time of order. A 2% convenience fee is applied when using VISA, MasterCard or DISCOVER, and a 3% convenience fee is applied when an American Express credit card payment is arranged after an order has shipped.

3. ACH ELECTRONIC TRANSFER: Offers you the option to pay electronically. Automated Clearing House (ACH) processes the authorized transaction and sends an Electronic Funds Transfer (EFT) directly from your account to ours. There is no service fee to pay this way. Call customer service for details.

4. WIRE TRANSFERS: Call for details.

SHIPPING INFORMATION

Same Day Shipping:
Our order cutoff times vary based on shipping method. In most cases, orders placed by 1:00 p.m. EST for LTL freight, 2:00 p.m. EST for USPS, and 3:00 p.m. EST for UPS services will ship same day, subject to prior credit approval, agreement approval, and item availability. Expedited shipping can be arranged, with applicable shipping charges. Appropriate freight charges may apply for special shipping conditions, delivery appointments, lift gate requirements, inside or home delivery of certain items. PLEASE NOTE: If shortages should occur in your order, we require shortages to be documented with the carrier and notification be made to GEMCO Medical within 48 hours.

Home Delivery Drop Shipments:
GEMCO Medical will ship directly to YOUR customer, on your behalf. Call your sales representative for more details.

GEMCO Medical, a distributor of healthcare supplies, may from time to time drop ship goods directly to end users on behalf of the Purchaser. By drop shipping on the Purchaser's behalf, Purchaser agrees to indemnify and hold harmless GEMCO Medical from any and all liability for possible damages resulting from failure of Purchaser to fully comply with any obligations, including but not limited to the delivery of product, assembly and set up, measurement or fit, or patient instructions on use required by Medicare, Medicaid, or other Third Party entity. Purchaser also agrees to indemnify GEMCO Medical from any and all liability from damage, bodily injury or other adverse personal effect resulting from improper assembly or set up of product, improper use of product for any reason, improper measurement or fit to patient, or other negative impact resulting from anything other than the normal shipment of product on behalf of Purchaser by GEMCO Medical.

GEM EDWARDS PHARMACY - Your Mail Order Pharmacy

GEMCO Medical has a board certified pharmacy in house to help you with your customers' needs. Your customers' prescription(s) can be phoned, faxed or mailed to our pharmacy from their physician. The prescription will be delivered directly to your customers' home. In most cases, medications are shipped within 24 hours. Call us toll free at 800-733-7976, Monday through Friday, 8:30 a.m. to 5:00 p.m. EST.

GEM Edwards Pharmacy:

   - More than 15 years of experience in dispensing mail order pharmaceutical prescriptions.
   - Convenience of prescriptions shipped directly to your customers' home.
   - HIPAA compliant.
   - Our courteous and knowledgeable customer service representatives will answer all of your questions.
   - Your privacy is protected – your customers' prescription(s) will arrive in a plain unmarked package.

RETURN POLICY

Written authorization is required prior to the return of any product. GEMCO Medical will provide the dealer with a Return Material Authorization (RMA) number upon verification and approval of the return request. Upon receipt of authorization to return product, the customer is required to note the Return Material Authorization number on the original packing list and ship the product in the original carton in resaleable condition to the designated GEMCO Medical facility.

Defective products in addition to the above require a detailed description of the defect to be provided prior to issuance of a RMA for the return. GEMCO Medical will inspect the defective product in accordance with the manufacturer's requirements and then determine if the product will be repaired, replaced or credited. Manufacturer's warranty has first priority.

Notification of shortages and/or damages must be made within three business days of receipt. All returns require a Return Merchandise Authorization number (RMA#) from the GEMCO Medical Customer Service Department. This number is valid for 30 days. A copy of the invoice must accompany the return for proper credit to be issued.

Returns received at a GEMCO Medical facility without prior approval will not be credited. All authorized returns must be shipped to the destination specified by GEMCO Medical. GEMCO Medical will advise the dealer of the preferred shipping method upon issuance of the Return Material Authorization Number. Collect shipments and/or unauthorized returns are subject to refusal and will be returned to the dealer at the dealer's expense. GEMCO Medical reserves the right to charge a restocking fee in an amount equal to 25% of the value of the original shipment to the dealer.

Authorized returns must be shipped back to GEMCO Medical in the original carton and must include all parts, accessories and product instructions. Unauthorized products returned with authorized products may be discarded. GEMCO Medical reserves the right to discard any authorized or unauthorized returns.

There will be no credit issued for products that are not resaleable, including but not limited to products that have been damaged, opened, expired or misused. No returns on special order items, which includes products that GEMCO Medical does not usually carry and/or stock.

When contacting a Customer Service Representative to request the return of merchandise, please be prepared to provide the following information:

    (1)   The reason for the return.
    (2)   The quantity of each item and number.
    (3)   Invoice date and number showing the merchandise you received.
    (4)   Serial number if applicable.

Dealer is responsible for maintaining and servicing all products purchased from GEMCO Medical. This includes the means to provide warranty service as stated in GEMCO Medical Warranty Policy.

WARRANTY POLICY FOR GEMCARE™ PRODUCTS

GEMCO Medical warrants that its proprietary GemCare products will be free from defective workmanship and materials, including a limited lifetime warranty on certain products. Please refer to each product for the specific warranty period.

This warranty does not apply to breakage or failure due to tampering, misuse, neglect, accidents, modification or shipping. GEMCO Medical's sole obligation under this warranty shall be limited to providing parts, repairs, and/or product replacement at GEMCO Medical's sole discretion. Product that is returned to GEMCO Medical that is deemed to be repairable in accordance with the terms of GEMCO Medical's return policy will be returned to the dealer along with the appropriate repair parts with freight charges prepaid and added to the invoice.

All parts replaced in a warranty repair must be returned to GEMCO Medical's distribution facility in accordance with GEMCO Medical's return policy. The issuance of credit is subject to GEMCO Medical's evaluation of the returned item(s) to determine warranty eligibility.

Catalog Disclaimer:

GEMCO Medical is not responsible for typographical errors relative to sizes, and/or descriptions. We reserve the right to discontinue or modify any product in this catalog at any time without prior notice. No part of this catalog may be reproduced in any form, by any means - electronic, mechanical, photocopying, recording or otherwise - without prior specific written permission of GEM Edwards Inc. d/b/a GEMCO Medical.

GEMCO Medical has included medical billing information in this catalog, as a service to our customers. The medical billing information is not a guarantee of payment or coverage. We cannot guarantee the accuracy of the information printed herein and are not responsible for claims or liabilities that may result from the use of this information. The medical billing information and coverage policies are frequently revised. Please review policies before submitting claims. No independent verification of the data is claimed or implied.

Table of Contents
The 2013 GEMCO Medical Product Catalog

GEMCO Medical's Diabetes Programs

GEMCO Medical is an authorized distributor of brand name diabetes products; specializing in diabetes programs for **Durable Medical Equipment Dealers, Mail Order Providers,** and **Independent Pharmacies**. Through manufacture contracts, GEMCO gives you access to diabetes products at discounted prices that are billed to Medicare, Medicaid (only if processed as a medical benefit), and/or Third Party Medical Benefit insurances. Throughout this catalog, there are GEMCO item numbers listed in red, which denotes Medicare, Medicaid, Medical Benefit eligible products.

Look for the Manufacture Program Box on every page for specific details on each Manufacturer's Diabetes Program.

In addition, we have diabetes products to meet all of your needs, including but not limited to, retail products for cash patients and/or pharmacy benefit billing and all of the ancillary products that go along with diabetes management.

Program Definitions

What is Medicare?
Medicare is a nationwide, federally administered health insurance program that covers most people age 65 and older. Some younger people who are disabled or who have End-Stage Renal Disease are also eligible for coverage.

What is Medicaid?
Medicaid is available to certain low-income individuals and families who fit into an eligibility group that is recognized by federal and state law. All of GEMCO's manufacture contracts are for medical benefit Medicaid programs.

What is Medical Benefit?
Medical Benefit can be defined as coverage administered through a traditional or managed care insurance plan that covers medically necessary supplies and services that are not considered hospital or pharmacy items.

Private Health Insurance Plans have several different types of benefits:

Hospital benefits - cover in-patient and out-patient surgeries, hospital stays, medical procedures, etc.

Prescription benefits - covers oral medications and some medications that are injected into the body.

Medical benefits - durable medical equipment, lab work, flu shots, office visits, etc.

The majority of medical benefit insurance carriers bill through HCPCS codes for diabetes products. For example, the biller will use the same HCPCS code for all test strips and will get the same reimbursement for each test strip, regardless of what brand it is. Each state will have a slightly different reimbursement amount, and the biller should check the insurance policy or the Centers for Medicare & Medicaid Services website under DMEPOS Fee Schedule at www.cms.hhs.gov.

Note: Some pharmacies may use an adjudicator, and they may still bill for medical benefit using the NDC number, as long as the adjudicator changes it to the correct HCPCS code.

What is Pharmacy Benefit?
Pharmacy Benefit billing is when a pharmacy bills for a product or service using the product's NDC number. For example, based on the NDC number and insurance plan, the pharmacy will get different reimbursement rates for different test strip brands. The pharmacist will also charge a dispensing fee.

OptiumEZ
Blood Glucose Monitoring System

OptiumEZ provides simple, everyday testing, with a sample size of 0.6 microliters and a fast, 5-second test time. The OptiumEZ system features a specially designed end-fill/top fill test strip with visual confirmation, which makes sample application simpler and more flexible for blood glucose testing. The OptiumEZ blood glucose test strip also minimizes the effects of interfering agents such as aspirin, vitamin C and acetaminophen.

Why do OptiumEZ test strips come individually wrapped in foil packages instead of vials? Clinical studies[1,2,3] indicate that leaving test strip vials uncapped can significantly affect the accuracy of results. Each OptiumEZ test strip is sealed in an individual foil packet to protect it from air and moisture. Studies[1, 2] show that foil wrapping individual test strips is important for ensuring the accuracy of glucose monitoring in the real world.

The OptiumEZ meter uses only OptiumEZ test strips.

GLUCOCARD®
Blood Glucose Monitoring System
Vital™

Everything a blood glucose meter should be – fast, accurate and easy to use. A tiny 0.5 µL sample size in our GO-based test strip platform gives accurate results in as little as 7 seconds. And the auto coded meter has a 250 test-memory to help you keep track of your "Vitals."

Every GLUCOCARD® meter system is backed by Arkray's comprehensive YouChoose™ patient wellness program. Exclusively for GLUCOCARD® patients, this program provides free education and support materials including:

- The nine-inch smart plate
- "Smart Servings" portion guide
- A DVD featuring ideas of dining out, reading food labels, grocery shopping, and more
- Access to our integrated glucocardyouchoose.com website
- ARK Care™ Real-time Diabetes Management System allows people with diabetes to easily upload and store their blood glucose readings from their blood glucose meter. This provides medical equipment providers with logbooks and reports to track and document frequency of testing.
- Quarterly newsletters
- Delicious and nutritious recipes
- Access to our virtual health coach, "Ask Mary™"

ARK Care

GLUCOCARD®
Expression™
AUDIO-ENABLED BLOOD GLUCOSE MONITORING SYSTEM

The GLUCOCARD® Expression™ Blood Glucose Monitoring System includes bilingual voice features for hearing test results. Oversized picture icons and large tactile buttons make this meter easy to use. Testing is more comfortable with small sample size and alternate site testing. Accurate and reliable test results are displayed in six seconds.

Medicare, Medicaid and Medical Benefits Insurance Providers Diabetes Program

Participation Requirements
Dealer must accept assignment with Medicare on ARKRAY Diabetes Products and have a current Medicare Provider Number. Dealer cannot use products for retail sale or pharmacy benefit programs. Dealer will actively promote ARKRAY Diabetes products to their consumer base.

All GLUCOCARD® meter kits include: meter, control solution, lancing device, 10 test strips, and 10 lancets.

Active Enzyme	GDH-FAD
Warranty	5 Years

Bayer's new meter system advances accuracy with innovative technology*. The CONTOUR® NEXT EZ meter demonstrated better accuracy in lab testing than other leading meters** across a broad range of glucose levels.[1] CONTOUR® NEXT test strips feature Bayer's No Coding™ technology and are unaffected by many common interfering[+] substances and medications.

*Compared to other meters from Bayer using the CONTOUR® platform. **TRUEtrack®, FreeStyle Freedom® Lite, OneTouch® Ultra® 2, ACCU-CHEK® Aviva. [+]Bayer's CONTOUR® NEXT test strips with GDH-FAD chemistry cross-react with xylose. Do not use CONTOUR® NEXT test strips during or shortly after a xylose absorption test. Reference: 1. Data on file, Bayer HealthCare Diabetes Care (Bayer Sponsored Study).

Medicare, Medicaid and Medical Benefits Insurance Providers Diabetes Program - Health Plan/Contract, Patient Use Only Packaging

Benefits of Bayer Healthcare's Diabetes Program
Bayer Diabetes Care Authorized Program ensures product integrity, and lower costs on select diabetes products for increased profits. Program administered by GEMCO Medical.

How to Qualify
Dealer is required to sign a DME-M Agreement that outlines all the conditions of the Bayer Diabetes Care Program. Dealer will purchase "DME/ Medical Benefit" labeled product from GEMCO Medical. "DME/ Medical Benefit" product is available for Medicare, Medicaid and Medical Benefit insurance billing only. Dealer may not use this product for cash patients, retail sale, or pharmacy benefit insurances.

Billable Meter onlys are available for a charge so that the Dealer may bill the insurance provider for the meter.

Participation Requirements
Dealer must accept assignment with Medicare on Bayer Diabetes Products and have a current Medicare Provider Number. Dealer will actively promote Bayer Diabetes products to their consumer base.

Recommend Bayer's CONTOUR® meter and test strips for your patients with diabetes.

Make CONTOUR® your choice:

The CONTOUR® meter is easy to use, learn, and teach, so that you can focus on patient care instead of meter training

- **No Coding™ technology** — eliminates inaccurate results due to miscoding

- Small blood sample

- **Trusted accuracy** with features that reduce many common sources of error[1]
  - Automatic hematocrit correction
  - **Sip-in Sampling® technology** automatically draws the sample into the test chamber to help patients test correctly
  - Underfill detection indicates if the sample size is too small, which helps prevent inaccurate readings

Easy-to-read display

Ready to use right out of the box

ONETOUCH®

A simple way to see the effect of food on your blood sugar results. The OneTouch® Ultra®2 Meter works with OneTouch® Ultra® Blue Test Strips, the only brand with DoubleSure™ Technology which automatically checks each blood sample twice, requiring only a speck of blood and providing results in 5 seconds. Features include two-way scrolling buttons and backlight. Plus an option flagging feature, which notes before and after meal results to help see the link between blood glucose results and food choice.

OneTouch® DME Net Pricing Program - For DME Beneficiaries Only Packaging (Beneficiaries of Medicare/Medicaid/ 3rd Party Insurance DME Benefit)

Benefits of OneTouch® DME Net Pricing Program
You get an upfront discounted price. Your customers get OneTouch® quality. The OneTouch® DME Net Pricing Program provides you with low, flat-rate pricing on OneTouch® Ultra® Test Strips sold to Medicare, Medicaid, or managed-care patients with a DME Benefit only.

When can you use the OneTouch® Ultra® Test Strip DME SKU (gray box)?
The gray box contains the same great OneTouch® Ultra® Test Strips but is ONLY for your patients with the DME benefit.

Eligibility
Requirements for participation are[+]: be a licensed DME store or pharmacy, have 10 or fewer stores under single ownership, have an active provider number, accept that product is intended for only DME beneficiaries of Medicare, Medicaid, or managed-care insurers.
[+]Additional conditions might apply.

Easy Registration
Visit www.OneTouchNetPricing.com to register and select GEMCO Medical as your distributor. Follow the rest of the steps online to finalize your agreement.

OneTouch® Ultra®2 system kit includes: meter, lancing device, 10 test strips, and 10 lancets.

Diabetes Supplies

	OneTouch® Verio® IQ Meter
Test Strip	OneTouch® Verio® Test Strips
Test Time	5 Seconds
Sample Size	0.4 µL
AST	Forearm
Coding	No Coding
Memory	750 Test Results
Download Capabilities	Yes
Range	20-600 mg/dL
Battery	Rechargeable
Active Enzyme	GDH- FAD
Warranty	3 Years

Testing is simple with OneTouch® Verio® IQ. Every time patients test, the OneTouch® Verio® IQ Meter looks for repeated highs and lows and alerts patients right on screen when it finds a pattern. Features high-resolution color LCD display, testing illumination, 750-test memory, no manual coding and an eco-friendly rechargeable battery. Works with the OneTouch® Verio® Gold Test Strips. It's the strip with SmartScan™ Technology, which actively scans each sample 500 times correcting for common interferences to provide a precise, accurate, reliable result.

Diabetes Supplies

OneTouch® Delica® with Advanced Glide™ Control System with less motion, more control and reduced vibration, for a smoother, more precise lancing. Compatible with OneTouch® Delica® Lancets.

OneTouch® Verio® IQ System Kit includes: meter, lancing device, 10 lancets, mini USB cable, and AC adapter.

OneTouch® Home Delivery Program

ONETOUCH®

Program Details

- Discounted OneTouch® Test Strips available as a drop ship/home delivery program.

- Dealer must have a valid Medicare provider number.

- HIPAA compliant.

- Cost/shipment: Call GEMCO for current rates.

- Available for OneTouch® consumers who qualify for Medicare, Medicaid or Medical Benefit Insurance.

- Please note the following consumers do not qualify:
  - Consumers who are covered by a pharmacy benefit.
  - Consumers covered by California State Medicaid Program.

- OneTouch® DME Net Pricing Agreement must be executed in order to qualify.

- LifeScan will contact you once yearly to verify:
  - Provider number.
  - Active Medicare status.

OneTouch® Home Delivery Products

- Reduced pricing available on OneTouch® Ultra® and OneTouch® Verio® IQ home delivery products.

- OneTouch® Select™ products are also available for home delivery.

- A unique patient identification number is required for OneTouch® home delivery shipments.

What you need to know when ordering

- All first time customers must complete a GEMCO Medical drop ship form in order to ensure accuracy of fulfillment.

- Provide consumer's name and address by fax, phone, email or website via on-line ordering either as individual names or as a list. LifeScan also requires you to supply a unique patient identification number for each consumer.

- Provide your full company name, as shipping package will arrive with your packing slip.

- List quantity and product to be shipped to your customer.

- Shipping label and packing slip can be customized based on your preferences.

TRUEbalance™

True confidence for simple, accurate testing. TRUEbalance™ system is a no-coding system that simplifies diabetes testing. It eliminates the coding step and expedites the testing procedure when a new vial of test strips is used. TRUEbalance™ also features large test strips for easier handling, easy-to-read display and fast test time.

EASY**Max** L

Testing made easy, so you can live life to the max! The slim and sleek EasyMax L Blood Glucose System with its blue backlight display and test strip port illumination makes testing easy no matter where you are!

• The bright blue backlight display gives the option to test discreetly in hard to see places like movie theaters, dimly lit restaurants, and at bedtime without disturbing others.

• The large strip makes for easy handling, and less frustration due to dropped, unusable test strips.

The EasyMax family of meters -

EasyMax L - Backlight display and test strip port illumination

EasyMax V - Speaks test results in English or Spanish

EasyMax N - Simple to use

Offer your customers choice, while keeping inventory simple for you!

All three meters use the same test strip!

EasyMax Products are Available for ALL Customers and Markets.

Ask us about EasyMax's Long Term Care Program.

Prodigy Autocode®

PRODIGY AutoCode

The Prodigy AutoCode® Talking Blood Glucose Meter is excellent for the blind, low vision or any diabetic patient who wants to hear their test results. The Prodigy AutoCode® requires No Coding, which means fewer steps and avoids the danger of false results caused by coding errors. Simply insert the test strip into the strip port and the Prodigy AutoCode® automatically turns on. The Prodigy AutoCode® talks the user through the testing steps, making it easy to use while providing safe, accurate test results every time.

• Easy to use - No coding required
• Speaks in 4 Languages: English, Spanish, French & Arabic
• Approved for alternate site testing
• Hear and see accurate results in just 7 seconds
• Standard USB port to easily download test results

ACCU-CHEK® Nano

Small in size. Big in performance.

- **Advanced accuracy** with ACCU-CHEK® SmartView test strips - as tested against a 23% tighter specification.[1]
- **Brilliant backlit display** makes reading your numbers easy anytime, anywhere.
- **Small, sleek design** - fits in the palm of your hand.
- **No coding** - Fewer steps in testing.

Medicare, Medicaid and Medical Benefits Insurance Providers Diabetes Program - For Mail Order Use Packaging

Benefits of Roche's Diabetes Care Program
Roche Diabetes Authorized Program ensures product integrity, and lower costs on select diabetes products for increased profits. Program administered by GEMCO Medical.

How to Qualify
Dealer is required to sign a Letter of Participation that outlines all the conditions of the Roche Diabetes Care Program. Dealer will purchase "Mail Order" product from GEMCO Medical and use for Medicare, Medicaid and Medical Benefit insurances only. 90% of product shall be mailed or delivered by company vehicle, while 10% can be dispensed at store location. Dealer may not use this product for cash patients, retail sale, or pharmacy benefit insurance.

Participation Requirements
Dealer must accept assignment with Medicare on Roche Diabetes Products and have a current Medicare Provider Number. Dealer will actively promote Roche Diabetes products to their consumer base.

Diabetes Supplies

	OneTouch® Ping™ Insulin Pump
Size (mm)	50.8 x 82.55 x 21.59
Weight	3.9 oz
Colors	Blue, Black, Silver, Pink, LimeLight
Battery	Lithium or Alkaline 1.5 V
Cartridge Capacity	200 Units
Waterproof	Up to 12 ft for 24 hrs
Infusion Set	Standard Luer Lock
Basal Rate	.025 - 5.00 u/hr
Smallest Bolus	.05 Visual
Test Strip Used	OneTouch® Ultra®
Memory	500 Bolus, 270 Basal

OneTouch® Ping® is the first system with a full-function pump and wireless meter-remote. The screen is self-illuminating and high contrast for readability and viewable from a wide angle. Using the OneTouch® Ping® meter-remote, a person can calculate an insulin dose and wirelessly control all pump functions for insulin delivery, making pumping discreet and convenient. The great thing about insulin pumps is that they free you from the constraints of multiple daily injections and strict eating and sleeping schedules. Even better, OneTouch® Ping® gives you a combination of great clinical performance* and lifestyle-friendly features.

*Twenty-four patients with type 1 diabetes used the bolus calculators from the Animas® 2020, Medtronic Paradigm®, and Roche Accu-Chek® Combo insulin pump systems to correct postprandial hyperglycemia. The Animas® 2020 bolus calculator algorithm is identical to the OneTouch® Ping® bolus calculator algorithm.

Pump Supplies

MiniMed Paradigm® 523/723 Revel™ Insulin Pump

The MiniMed Paradigm® Revel™ System, Medtronic's second generation integrated system, incorporates new innovative CGM features including predictive alerts that can warn you of oncoming lows or highs allowing for greater control. With precise insulin delivery and integrated CGM technology, the Paradigm® Revel™ System gives you the peace of mind you want and the freedom you deserve.

- On-screen icons for battery level, reservoir level & time of day.

- Alerted Directed Navigation: takes patient to appropriate screen needed to resolve alerted condition.

- Managing glucose levels: predictive and rate of change alerts.

- Multiple high/low glucose thresholds.

- Five color choices: Blue, Clear, Pink, Purple, Smoke.

- Missed meal bolus reminder.

- Wireless transmitter - small, discrete, & waterproof.

- REAL-Time continuous glucose monitoring system; measures your glucose levels continuously, as an addition to fingerstick measurements.

- Carelink™ software is a free online tool that automatically captures blood glucose readings, carbs, and insulin data from your Paradigm® Revel™ Insulin Pump and wireless meter.

	MiniMed Paradigm® 523/723 Revel™ Insulin Pump
Size	523: 2 x 3 x 0.8", 723: 2 x 3.6 x 0.8"
Weight	523: 95 grams, 723: 102 grams
Power Source	1 AAA Alkaline Battery
Basal Rate Range	0.025 units per hour increments
Basal Rates & Patterns	3 patterns, 48 rates each
Accuracy of Delivery	+/- 5%
Reservoir	523: 176 units, 723: 300 or 176 units
Warranty	4 Years, including a 30 day money back guarantee

Pediatric Pumps Available

Pump Supplies

MiniMed Paradigm® REAL-Time (CGM) Starter Kit
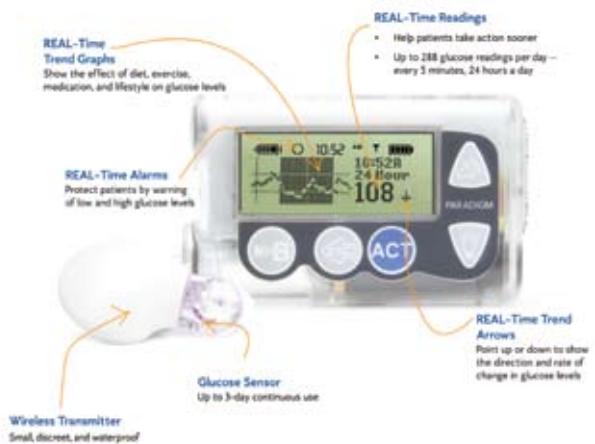

Paradigm® REAL-Time CGM

The only integrated diabetes management system - combining an insulin pump with REAL-Time Continuous Glucose Monitoring gives patients REAL access to glucose patterns, to optimize their diabetes management. REAL-Time trend graphs, readings, and directional arrows show the effects of diet, exercise, medication, and lifestyle on glucose levels.

When you add CGM to an insulin pump, your patient has more information about where their glucose is now and where it is going.

MiniLink™ Charger

MiniLink™ Transmitter

MiniMed Paradigm® REAL-Time Starter Kit communicates with your patient's MiniMed Paradigm® Insulin Pump.

MiniMed's Guardian REAL-Time Continuous Glucose Monitoring System works as a stand alone system with a separate monitor.

ACCU-CHEK®
INSULIN DELIVERY SYSTEMS

Dealer is required to sign a Roche Insulin Delivery Systems Inc. Letter of Participation in order to purchase ACCU-CHEK® pumps and pump supplies.

ACCU-CHEK® Spirit Combo Insulin Pump

The ACCU-CHEK® Spirit Combo system offers an easy, quick, and discreet way to manage insulin pump therapy. Through Bluetooth® technology, patients can control nearly all pump functions using the ACCU-CHEK® Aviva Combo blood glucose "smart meter". The meter screen displays the current insulin pump screen. The ACCU-CHEK® Aviva Combo meter provides accurate blood sugar measuring. The meter uses ACCU-CHEK® Aviva Plus test strips, which offer improved accuracy - as tested against a 23% tighter accuracy specification[1]. There is a clear display of blood sugar values in 5 seconds. The pump can operate independently of the meter, should the need arise.

The ACCU-CHEK® Spirit Combo insulin pump provides flexibility to match your lifestyle. The temporary basal rate function lets you quickly adjust basal rate delivery to match changing conditions (illness, exercise, stress, premenstrual, etc). Fewer barriers to regular bolusing, may result in greater adherence to recommended therapy.

ACCU-CHEK® Spirit Combo Insulin Pump	
Size (mm)	82.5 x 56 x 21
Weight	2.8 oz
Reservoir Size	Up to 315 Units
Infusion Set Connection	Standard Luer Lock
Basal Rate	0.05 to 50 units/hr
Battery	1 AA Alkaline Battery or Lithium Battery
Memory	1000 Results
Software	ACCU-CHEK® 360º Software
Test Strip Used	ACCU-CHEK® Aviva Plus

Features:

- Full-color, on-screen graphs of blood sugar and bolus data
- On-the-go data management - no PC or internet required
- Programmable reminders - test reminders and date reminders
- On-screen status bar that immediately shows if blood sugar is in/out of range
- Key lock feature to prevent accidental activation of functions
- Backlight - low, medium, high

ACCU-CHEK® Tender Infusion Sets

The ACCU-CHEK® Tender infusion set is a 20˚-45˚ insertion infusion set with a soft Teflon cannula for comfort. A transparent window is built into the ACCU-CHEK® Tender infusion sets hypoallergenic cotton adhesive base, which allows the wearer to easily detect inflammation at the infusion site. ACCU-CHEK® Tender infusion sets also feature PVC-free double layer tubing with an inner layer of polyethylene and an outer layer of polyethylene. The combination allows for minimal filling volume and skin-friendliness.

The connection slides into and out of the base with an audible <<click>> which allows for safe connection without looking at the infusion site.

ACCU-CHEK® Tender infusion sets are also available in a 13mm "mini" size. ACCU-CHEK® Tender "mini's" 13mm cannula is nearly 25% shorter than the 17mm cannula in the original ACCU-CHEK® Tender Infusion Set.

ACCU-CHEK® Tender and ACCU-CHEK® Tender "mini" infusion sets are designed to work with all standard luer lock insulin pumps.

ACCU-CHEK® Rapid-D Infusion Sets

The ACCU-CHEK® Rapid-D infusion set is ideal for people new to pumps or with poor vision. It is ideal for applications in virtually any body location because of the unique design featuring a comfortable, ultra-thin 28 gauge needle with a 90-degree insertion. The ACCU-CHEK® Rapid-D infusion set also features a straight insertion and the "kink-proof" steel needle allows for a "no mistake insertion."

ACCU-CHEK® Rapid-D infusion set also has a PVC-free tubing and an ultra-thin needle that's easy to insert, simple to handle, secure without additional tape and comfortable to wear. The ACCU-CHEK® Rapid-D primes as an entire unit and therefore requires fewer steps to prepare the infusion set.

A box of ACCU-CHEK® Rapid-D infusion sets contain 15 needles, 5 transfer sets and 5 protective caps. Because the tubing can be used for up to six days, a box of ACCU-CHEK® Rapid-D infusion sets contain a typical one-month supply.

ACCU-CHEK® Rapid-D infusion sets are designed to work with all standard luer lock insulin pumps.

Pump Supplies

ACCU-CHEK® Ultraflex Infusion Sets

ACCU-CHEK® Ultraflex infusion sets have a reversible disconnect at the cannula site, with an audible <<click>> connection that makes connecting and disconnecting a simple, one-handed process, regardless of where the infusion is placed.

The ACCU-CHEK® Ultraflex infusion set also features a PVC-free, double-layered tubing with an inner layer of polyethylene, an outer layer of polyethylene and a silicone coated tapered cannula with a short introducer needle for smooth, comfortable insertion.

The ACCU-CHEK® Ultraflex infusion sets are designed to work with all standard luer lock insulin pumps.

Optional ACCU-CHEK® Link Assist insertion device is a great option for those who prefer automated insertion of the ACCU-CHEK® ultraflex infusion set.

Product Specifications	ACCU-CHEK® Ultraflex Infusion Sets
Introducer Needle	27 Gauge Stainless Steel
Cannula	25 Gauge Soft Teflon Cannula specially tapered for easy insertion
Cannula Lengths	8mm, 10mm
Tubing	Polyethylene Interior and Exterior Coating
Tubing Lengths	60 cm (24"), 80cm (31"), 110cm (43")
Cannula-Filling Volume	Introducer Needle Displacement, approx. 1 unit (U-100 insulin)
Priming Volume Per Set (U-100 Insulin)	60cm/24" approx. 11 units 80cm/31" approx. 14 units 110cm/43" approx. 18 units

ACCU-CHEK® Combo

Roche

Out of sight. In control.

The ACCU-CHEK® Combo system is designed to make insulin delivery easy, quick and discreet. Using *Bluetooth*® technology that provides 2-way wireless communication, you can control your pump with your meter, letting you quickly calculate and deliver a bolus on the meter and discreetly send it to the pump, without touching it. And thanks to a variety of options and features, the new system provides the flexibility you need to match your lifestyle.

To learn more about the ACCU-CHEK Combo system, visit **accu-chekinsulinpumps.com** or call **1-800-280-7801.**

With the i-port Advance™ Injection Port, skin punctures are reduced to just 1 every 3 days.

The i-port Advance™ is the first device to combine an injection port and an inserter in one complete set. It eliminates the need for manual insertion. Now with one click of the inserter, the injection port is easily applied to provide a simple and convenient way to take multiple injections without having to puncture the skin for each dose.

The i-port Advance™ you can:

- Take correction doses without the cost of an additional skin puncture

- Reduce the trauma that can follow multiple skin punctures

- Avoid skipping shots or altering your meals to avoid injections

- Minimize physical and emotional injection barriers

Infection, irritation or inflammation from using the i-port Advance™ is rare, however the potential exists. Typically, these occurrences may result from inadequate cleansing of the skin surface before application, improper application to the body, and/or improper maintenance of the insertion side. If your customer experiences any of these they should contact their healthcare professional.

Syringes & Pen Needles
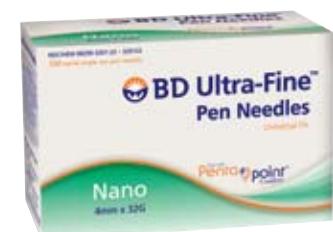

90 ct. Syringe and Pen Needle DME/HME/Mail Rx Program

Benefits of BD 90 ct. Program
BD Authorized Program ensures product integrity. Providers are authorized to bill all Medical Benefit and Mail Rx Benefit Insurance Programs. Lower acquisition cost for increased profits. Program administered by GEMCO Medical.

How to Qualify
Dealer is required to sign a BD Joinder Agreement which outlines the terms and conditions of the BD 90 ct. Diabetes Program. Dealer will purchase special label "Mail Order" product from GEMCO Medical.

Participation Requirements
Dealer must bill products on patient's behalf as a Medical or Mail Rx Insurance Claim. Dealer cannot use products for retail sale to cash paying customers. Dealer will actively promote BD Syringe and Pen Needle products to their customer base.

Less Cost per Unit than Retail!!

UltiCare™ Insulin Safety Syringes

Providing a premium quality, low cost alternative that protects patients and health care professionals. Bold markings are easily read through the safety shield.
Preparation - Draw up and administer medication following established protocol.
Post Injection - After injection, extend safety shield forward until a click is heard.
Lock - After safety shield is fully extended simply twist it in either direction until you hear a click. The needle is now fully protected.

UltiGuard™ All-In-One Dispense & Dispose Solution

UltiGuard™ is the complete home syringe dispenser system. The patented, tamper proof container provides security & safety. UltiGuard™ is ready-to-use. Premium UltiCare™ syringes are shipped and stored within the container until needed. With one easy movement, the syringes are discarded into the top of the UltiGuard™ container, virtually eliminating accidental needle sticks.

Delta™ Ultra Light 1000, Full Electric Bed

450lb WEIGHT CAPACITY

Once installed, the high/low shaft will stay with the bed. The transition box allows you to change the rotation of the high-low shaft. The wood grain panels are break and scratch resistant. Labels and color-coded springs assure accurate installation of side rails for patient safety. Unique motor is completely self-contained to reduce weight and noise. In the event of a power failure, a 9 volt battery, located in the motor, can lower the head and foot sections nine times. No crank needed. New and improved hand pendant has large, easy to use controls. Warranty (Original Purchaser) 5 years on motor and hand control, Limited Lifetime on welds and frame. 1 year on all other parts and components.

Personal Emergency Response Systems

NO MONTHLY FEES, EASY SET UP

24/7 EMERGENCY PROTECTION

Guardian Alert® 911

Guardian Alert® 911 enables you to call "911" in an emergency situation (accident, fall, illness, or danger). You talk directly to the emergency operator, not to a call center. In an emergency, press the activation button on the Guardian Alert® 911. The pendant immediately calls 911.

Two-Way Voice Speakerphone Pendant - talk and listen. Pendant can be worn around the neck, clipped on a belt, or carried in a pocket at all times.

No Charging Necessary - replaceable alkaline battery (included) lasts 1 year in standby or for up to 30 minutes of talk time.

Auto Power Off - after 5 minutes or inactivity.

Item #	Description
GA911	Guardian Alert® 911 (Includes: Pendant, Base Station, 7 Ft. Phone Cord, AC Adapter, Lanyard, Belt Clip, AAA Alkaline Battery)
GA911BB	Guardian Alert® Battery Backup System
GA911TD	Guardian Alert® Promotional Counter-Top Display

FreedomAlert®

FreedomAlert® is the world's first 2-way emergency pendant communicator. Your FreedomAlert® pendant will allow you to communicate your message instantly and efficiently from anywhere in and around your home. All with ONE button activation.

Program Up To 4 Numbers - friends, family, neighbors, and emergency personnel.

Voice Prompted System - provides announcement during set-up, testing, battery test and full system check.

System has standby emergency battery power - provides up to 24 hours of standby power in the event of a power failure. Two rechargeable batteries included. One charges in the base station charger, while the other is in the pendant. Simply swap the batteries around every few months.

Pendant can be carried in 3 convenient methods - included with each system is a Lanyard, a Wrist Strap/Wheelchair Strap holder and a Belt Clip.

Meets the requirements of NENA - National Emergency Number Association is the affiliation of 911 emergency operators.

Personal Care

"BEST IN CLASS" PREMIUM ANTI-FATIGUE FLOOR MATS

Take a stand on WellnessMats® and say goodbye to back, knee and foot pain that is often associated with standing for any period of time. WellnessMats® are medically proven to promote and increase proper circulation and encourage better posture, muscle conditioning, and improve overall health and well-being.

Easy to clean and lightweight, these one-piece construction mats feature a non-skid top and bottom. All WellnessMats® are engineered with Advanced Polyurethane Technology™ (APT) that allows the mats to be safe and non-toxic, soft, strong, and never lose their "bounce".

Standing is believing®...

• Unmatched comfort
• No-trip beveled edge (ADA Compliant)
• Puncture, heat, and stain resistant
• Inherently anti-microbial
• No unfriendly odors
• All components are 100% made in the USA
• Backed by a comprehensive 7-year warranty

Gravity 7 Long Term Care Pressure Redistribution Mattress

Economical option maximizes value and comfort with 3 full layers of foam available with or without raised side rails. Top layer uses unique die-cutting and a true memory foam heel section to optimize zoned pressure redistribution. Bottom layer provides full length horizontally scored articulation cuts extending the durability and life of the mattress significantly. Cover is fire retardant, fluid proof, tear resistant, low sheer, and easy to clean. 1 Year Warranty on the cover. 7 Year Limited Warranty.

Wound Care

The Definition of Medicare

Medicare is a federal health insurance program for United States citizens over 65 years of age, permanently disabled people under the age of 65, and people with end-stage renal disease (ESRD).

The Definition of a Medicare Beneficiary

A Medicare Beneficiary is any United States citizen over the age of 65.

OR

• Anyone under the age of 65 who has been receiving Social Security disability benefits for more than 24 months.

• Anyone under the age of 65 who has been receiving Railroad Retirement benefits.

• Anyone at any age with end-stage renal disease (ESRD).

• Anyone at any age who is the spouse or dependent of a person with ESRD.

• Anyone unable to engage in any substantial gainful activity by reason of any medically determinable physical or mental impairment which is expected to last not less than 24 months.

• Anyone age 65 or older who is eligible for Social Security or Railroad Retirement benefits.

• Anyone age 65 or older who worked at least 10 years for the federal, state or local government.

Enrolling in Medicare

Medicare beneficiaries become enrolled in the Medicare Program either through automatic enrollment or by applying to the program when they become eligible.

Social Security Administration: Railroad Retirement Board:
(800) 772-1213   (800) 808-0772
www.ssa.gov

The Center for Medicare and Medicaid Services (CMS)

The Medicare Program is administered by the Center for Medicare and Medicaid Services (CMS), a division of the United States Department of Health and Human Services located in Baltimore, Maryland.

The primary function of CMS is to assure its contractors and state agencies properly administer Medicare.

CMS website: www.cms.gov
Medicare website: www.medicare.gov or 1-800-MEDICARE (1-800-633-4227)

CMS has established several regional offices/carriers to ensure proper support for all Medicare contractors. Medicare contractors are organizations that have agreements with CMS to locally/regionally administer the program for all providers in their specific states or region. Their primary responsibility is to process and reimburse Medicare claims submitted by providers.

Medicare Part A contractors are called Intermediaries.
Medicare Part B contractors are called Carriers.

The 2 Parts of Medicare

• Medicare Part A - Hospital Insurance (HI) that pays for inpatient hospital care and skilled nursing facility care. Hospice care and some home healthcare is also covered.

• Medicare Part B - Medical Insurance that pays for physician and non-physician services, outpatient hospital services, **durable medical equipment**, diagnostic tests, and various other medical services and supplies not covered by Part A. Medicare Part B is the largest single payer source for Home Health Care (HHC) products and services. Medicare reimbursement for HHC products revolves around the basic definition of DMEPOS, which is an acronym for Durable Medical Equipment (DME) and Prosthetics, Orthotics and Supplies (POS).

DME is defined as equipment or supplies that:

• Are primarily & customarily medical in nature, AND

• Can withstand repeated use, AND

• Are appropriate for use in the home, AND

• Are generally not useful to a person in the absence of the illness or injury which the equipment is intended for.

• Supplies can be further defined as items or accessories required for the effective use of medically necessary DME and are covered by Medicare.

• A physician must prescribe all DME to a Medicare beneficiary in order for it to be covered.

• In order for a service or supply to be covered by Medicare, it must be considered reasonable and necessary for the diagnosis or treatment of an illness or injury. A physician's order, or prescription is proof of medical necessity. Coverage and reimbursement for Home Blood Glucose Meters and their associated supplies and other DME (Durable Medical Equipment) such as wheelchairs, canes, oxygen equipment and hospital beds fall under Medicare Part B. Coverage of DME is subject to the requirement that the equipment be necessary and reasonable for the treatment of the illness.

Medicare Providers

The definition of Medicare Provider is any person or entity that provides medical care or services to Medicare Beneficiaries.

Part B Medicare Providers service Medicare patients by becoming "participating" or "non-participating" in the Medicare program.

Facts about Participating Providers

All Medicare claims must be filed on behalf of the patient.
Reimbursement comes directly from Medicare.
Medigap/Supplemental Insurance is automatically crossed over.
Access is given to beneficiary eligibility information.
Assignment MUST be taken on all Medicare covered items.

Facts about Non-Participating Providers

All Medicare claims must be filed on behalf of the patient.
Reimbursement comes directly from Medicare.
Medigap/Supplemental Insurance is automatically crossed over.
Assignment does not have to be taken on any or all Medicare covered items.
Assignment is chosen on a claim-by-claim basis.

The Basics of Medicare Claim Processing

The procedure of claims processing begins when a provider submits a claim to a Medicare contractor.

Medicare providers submit their claims electronically.

Once the contractor receives the claim, it is verified and then the determination of payment amount and the issue of that payment amount is made.

The contractor sends the Medicare patient a Medicare Summary Notice (MSN) every 30 days itemizing what services have been billed by the provider, the amount paid, and the amount the beneficiary is responsible for paying to the provider. The contractor also sends the provider a Medicare Remittance Notice (MRN) on "assigned claims".

Medicare Reimbursement

Medicare mandates that a beneficiary must pay a deductible of $140.^{00} for calendar year 2013 before a benefit payment can be made.

- Bills for services or supplies are applied toward the deductible.

- The deductible is applied to the approved charge; non-covered services do not count toward the deductible.

- Expenses are allocated to the deductible in the order in which the bills are received by Medicare.

After the beneficiary's deductible is met, Medicare (as the Primary Payer) reimburses 80% of the Medicare Allowed Amount (MAA) incurred during the balance of the calendar year.

The remaining 20% of the MAA is the payment responsibility of the patient and is referred to as the coinsurance. (This coinsurance could be covered by a Medicare supplemental type of insurance).

The Medicare Allowed Amount (MAA) is determined through a national coding system called HCPCS Level II National Codes. HCPCS (Health Care) Procedure Coding System is a uniform method for healthcare providers and medical supplies to report the use of professional services, procedures and supplies.

Note: Accepting assignment means accepting the MAA. A provider cannot bill for their costs that may be greater than the MAA; those costs cannot be covered if the MAA is too low.

Medicare as Primary or Secondary Payer

Medicare is a Primary Payer for those individuals who are eligible for Part B benefits. This means that claims for medical benefits must be submitted to Medicare first before other insurance is filed. There are some exceptions to this Primary Payer rule listed below.

Exceptions where Medicare may become a Primary Payer:

- Veterans Administration (VA)
- Federal Black Lung Program
- End-Stage Renal Disease (ESRD)

Exceptions where Medicare is considered the Secondary Payer (MSP):

- Bodily Injury Liability
- Workplace Injuries
- Employer Group Health Plans (EGHP)

For any questions about who pays first, call the Coordination of Benefits Contractor at 1-800-999-1118.

Blood Glucose Meters and Medicare

Home Blood Glucose Meters are covered under Medicare Part B as Durable Medical Equipment. For the proper testing and functioning of the meter, Medicare also covers lancets, reagent strips and other ancillary supplies necessary for testing, for patients for whom the device is indicated.

Eligibility for Home Blood Glucose Meters

Home Blood Glucose Meters and supplies are covered, under the basic definition of DME, for Medicare eligible patients who meet the following criteria:

1. The patient has diabetes, insulin or non-insulin treated, which is being treated by a physician (ICD-9 Codes 249.00-250.93); AND

2. The glucose meter and related supplies have been ordered by the physician who is treating the patient's diabetes; AND

3. The patient, or patient's caregiver, has successfully completed training or is scheduled to begin training in the use of the meter and supplies; AND

4. The patient, or patient's caregiver, is capable of using the test results to assure the patient's appropriate glycemic control; AND

5. The device is designed for home use.

For all glucose meters and related supplies, if the basic coverage criteria (1-5) are not met, then the items will be denied as NOT medically necessary.

 Source: DMERCs in conjunction with The American Diabetes Association.

Medical Necessity Documentation

The supplier must have an original written order for use of the home blood glucose meter. When the testing frequently changes, a new order is required.

The order must contain the following:

- List of item(s) to be dispensed
- Quantity of item(s) to be dispensed
- Frequency of testing ("as needed" is not acceptable on the order)
- The reason for the DMEPOS item (which can take the form of an ICD-9-CM Code) and/or diagnosis narrative information
- Whether the patient has insulin treated or non-insulin treated diabetes
- If a special-featured meter is requested, the patient's visual acuity must be documented.

A written order is required before submitting a claim to Medicare and this original must remain on file with the supplier.

Coverage of Blood Glucose Meters and Supplies

Supplies necessary for the proper functioning of the blood glucose meter are covered, but only if the meter itself meets the basic coverage requirements.

The following items are covered:

- Standard Meters and Special-Feature Meters
- Replacement batteries
- Calibrator solution/chips
- Lancets
- Spring-powered devices for lancets
- Blood glucose test reagent strips

The following supplies are NOT covered for Medicare beneficiaries because they are NOT considered to be required for the proper functioning of the meter.

- Alcohol, peroxide
- Urine test reagent strips or tablets
- Syringes

Special Coverage Considerations

Blood Glucose Meter with special features: Meters with special features such as voice synthesizers enable visually impaired patients with diabetes to use the equipment without assistance. These types of meters are covered if certain conditions are met. First, the patient and device must meet the basic coverage criteria (1-5) for a standard home blood glucose meter. Then the patient's physician must certify that the patient has a severe visual-impairment, defined as a best corrected visual acuity of 20/200 or worse, that requires the use of this special monitoring system.

** Calibrator Solutions/Chips and Code Keys/Chips - Code A4256 describes Control Solutions (Calibrator Solutions) containing high, normal, and low concentrations of glucose that can be applied to the test strips to check the integrity of the strips and functionality of the meter. This code does not describe the strip or chip which is included in a vial of test strips which calibrates the glucose monitor to that particular vial of strips.

Customer Rebates - Medicare patients are not eligible for the customer mail-in rebate included in many home blood glucose meters and kits. In order to be compliant with Medicare's Anti-Kickback Statute, a rebate must be redeemed at the time of sale and identified on the Medicare claim form when submitting.

Utilization Limits

Medicare puts limits on when, where and how often items/procedures may be provided. It does this by reimbursing claims based on the level of usage that is considered medically necessary. The Standard Utilization Limits are as follows:

Item	Insulin Treated Patients	Non-Insulin Treated Patients
Test Strips	100 every month	100 every 3 months
Lancing Device	1 every 6 months	1 every 6 months
Lancets	100 every month	100 every 3 months
Meter	1 every 5 years	1 every 5 years
Control Solution	1 every 3 months	1 every 3 months
Batteries	1 every 3 months	1 every 3 months

A maximum 3-month supply of diabetes testing supplies may be dispensed to a Medicare beneficiary at one time.

Supplies may ONLY be dispensed when a beneficiary has nearly exhausted the supply of test strips and lancets that had been previously dispensed. A beneficiary, or their caregiver, must specify refills of supplies before they are dispensed; the supplier cannot automatically dispense supplies on a predetermined regular basis, even if the beneficiary has "authorized" this in advance. The refill cannot be authorized more than 14 days prior to their next eligible date, and cannot be shipped more than 10 days prior.

Increasing the Utilization Limits

If a treating physician has ordered a frequency of testing that exceeds the Utilization Limits above, it must be documented in the patient's medical record the specific reason for the additional supplies. In addition, the patient must keep a logbook that documents the frequency of testing to support the claim for supplies above the established utilization limits.

When a particular patient requires supplies that exceed the standard guidelines, the following criteria must be met:

•	Standard coverage criteria for a glucose meter must be met.
•	The patient must have nearly exhausted their supply of test strips.
•	The treating physician must have seen the patient and evaluated their diabetes control within the last six months prior to prescribing.
•	Must be a medical reason documented in the medical record for the excess amount.

If these criteria are NOT met, all testing supplies in excess amounts of the standard will be denied as NOT medically necessary.

HCPCS Coding System

Importance of HCPCS
The following list summarizes the importance of using HCPCS Codes:

1.	HCFA mandated the use of HCPCS codes on Medicare claims, and many state Medicaid offices require them too.

2.	HCPCS codes improve the ability to correctly communicate services or supplies given to a patient without resorting to narrative descriptions.

3.	Using HCPCS properly reduces the chance of resubmission of claims for correction or review.

4.	Since most insurance carriers use HCPCS codes, claims coding and processing is more efficient and compatible.

5.	Consistent submission of "clean claims" (those claims with all correct information needed for accurate and timely reimbursement) will prevent audits for incorrect claims submission.

6.	HCPCS is essential for accurate and complete reimbursement.

HCPCS Codes for Blood Glucose Meters & Supplies

Medicare covered HCPCS Codes
A4253	Blood glucose test or reagent strips for home blood glucose meter, per 50 strips
A4233	Replacement alkaline battery for use with medically necessary home blood glucose meter owned by patient, each
A4234	Replacement j-cell battery for use with medically necessary home blood glucose meter owned by patient, each
A4235	Replacement lithium battery for use with medically necessary home blood glucose meter owned by patient, each
A4236	Replacement silver oxide battery for use with medically necessary home blood glucose meter owned by patient, each
A4256	Normal, low and high calibrator solution/chips (control solution)
A4258	Spring-powered device for lancet, each
A4259	Lancets, per box of 100
E0607	Home blood glucose meter
E2100	Blood glucose meter with integrated voice synthesizer (previous code E0609 has been deleted for 2002)
E2101	Blood glucose meter with integrated lancing/blood sample (NEW code)

The listing of any codes of HCPCS does not guarantee coverage of the specific item or service and Medicare will only reimburse items and services considered reasonable and necessary for the diagnosis.

Non-Medicare covered HCPCS Codes
A4244	Alcohol or peroxide, per pint
A4245	Alcohol wipes, per box
A4246	Betadine or pHisohex solution, per pint
A4247	Betadine or iodine swabs/wipes, per box
A4250	Urine test or reagent strips or tablets, 100 count
A9270	Non-covered item or service

Blood Glucose Meter "Kits": There is no HCPCS code that designates a Meter "Kit". Specifically the DMERCS have declared that these items in a "Kit" all may be coded for and billed separately: the meter (E0607), the control solution (A4256) and the lancing device (A4258).

HCPCS Two-Digit Modifier Codes

Modifiers are used with the five digit HCPCS codes when a procedure or device is altered by specific circumstances but does not change its basic definition. Modifiers KS or KX must be included with every HCPCS code being billed to Medicare to obtain reimbursement. If more than one modifier applies, simply add them both after the code. (Example: E0607 NU KS - a new meter for a non-insulin treated patient with diabetes).

KS   Any supplies billed for a patient with diabetes who is NOT insulin treated
KL   Mail Order
KX   Any supplies billed for a patient with diabetes who IS insulin treated
NU   New equipment
52   Reduced charges, not the usual or customary charge (if only 25 strips are dispensed, use the modifier A4253-52)

Billing Reminders to Prevent Denials
Denials will occur without the proper codes or modifiers. Remember these important points:

• Choose ALL proper codes that match the items prescribed to the patient.

• Place ALL proper code-modifiers after every code being billed.

• Include the diagnosis code on the claim form.

• Verify the date of service is correct. If items are being sent/mailed to a patient, then the date of service is the date that the items where shipped.

• Verbal orders from the treating physician are appropriate to dispense the items to the patient; but a written order must be obtained prior to the time of billing. The diagnosis MUST be on the order along with a statement of whether the patient is being treated with insulin or not.

• A physician's order is the proof of medical necessity. A new written order is required when there is a change in the testing frequency.

ICD-9-CM Codes

ICD-9-CM Codes are diagnosis codes that explain why a particular item of DME has been ordered. They refer to a health condition, injury or illness that a particular patient has been diagnosed with. Codes 250.0 through 250.9 refer specifically to diabetes and its complications. It is expected that the patients medical records will reflect the need for the care provided.

ICD-9-CM Codes specifically for Diabetes Mellitus:
249.00   Secondary diabetes mellitus without mention of complication, not stated as uncontrolled, or unspecified
249.01   Secondary diabetes mellitus without mention of complication, uncontrolled
249.10   Secondary diabetes mellitus with ketoacidosis, not stated as uncontrolled, or unspecified
249.11   Secondary diabetes mellitus with ketoacidosis, uncontrolled
249.20   Secondary diabetes mellitus with hyperosmolarity, not stated as uncontrolled, or unspecified
249.21   Secondary diabetes mellitus with hyperosmolarity, uncontrolled
249.30   Secondary diabetes mellitus with other coma, not stated as uncontrolled, or unspecified
249.31   Secondary diabetes mellitus with other coma, uncontrolled
249.40   Secondary diabetes mellitus with renal manifestations, not stated as uncontrolled, or unspecified
249.41   Secondary diabetes mellitus with renal manifestations, uncontrolled
249.50   Secondary diabetes mellitus with ophthalmic manifestations, not stated as uncontrolled, or unspecified
249.51   Secondary diabetes mellitus with ophthalmic manifestations, uncontrolled
249.60   Secondary diabetes mellitus with neurological manifestations, not stated as uncontrolled, or unspecified
249.61   Secondary diabetes mellitus with neurological manifestations, uncontrolled
249.70   Secondary diabetes mellitus with peripheral circulatory disorders, not stated as uncontrolled, or unspecified
249.71   Secondary diabetes mellitus with peripheral circulatory disorders, uncontrolled
249.80   Secondary diabetes mellitus with other specified manifestations, not stated as uncontrolled, or unspecified
249.81   Secondary diabetes mellitus with other specified manifestations, uncontrolled
249.90   Secondary diabetes mellitus with unspecified complication, not stated as uncontrolled, or unspecified
249.91   Secondary diabetes mellitus with unspecified complication, uncontrolled
250.0   Diabetes mellitus without mention of complication or manifestation
250.1   Diabetes mellitus with ketoacidosis
250.2   Diabetes mellitus with hyperosmolarity
250.3   Diabetes mellitus with other coma
250.4   Diabetes mellitus with renal manifestations
250.5   Diabetes mellitus with ophthalmic manifestations
250.6   Diabetes mellitus with neurological manifestations
250.7   Diabetes mellitus with peripheral circulatory disorders
250.8   Diabetes mellitus with other specified manifestations
250.9   Diabetes mellitus with unspecified complications

A fifth digit is added to the ICD-9-CM Code to further indicate whether the disease is insulin dependant, type 1 (juvenile type) or non-insulin dependant, type 2 (adult onset type).

0 = type 2, non-insulin dependant, without mention of complications
1 = type 1, insulin dependant, without mention of complications
2 = type 2, non-insulin dependant, uncontrolled
3 = type 1, insulin dependant, uncontrolled

DMERC - Durable Medical Equipment Regional Carriers

DMERC - Durable Medical Equipment Regional Carriers - Since 1993, CMS has regionalized the processing of claims for DMEPOS into 4 regional carriers called Durable Medical Equipment Regional Carriers (DMERCs). A DMERC is a financial institution, usually an insurance company, responsible for the screening and payment of claims, interpretation and implementation of federal regulations and collection of data. All Medicare claims for DME must be submitted to these special regional carriers (claims Processors) called DMERCs. Each DMERC has a defined territory encompassing a number of states. Claims jurisdiction and Medicare Allowed Amounts are determined by the state in which the beneficiary resides (beneficiary's permanent address).

PDAC - Medicare Pricing, Data Analysis and Coding

Noridian Administrative Services, LLC (NAS) serves as the Pricing, Data Analysis and Coding (PDAC) Contractor, performing the following activities that Palmetto GBA's Statistical Analysis DME Regional Carrier (SADMERC) performed prior to August 2008:

• Provide data analysis support to the DME Program Safeguard Contractors PPSCs).
• Guide manufacturers and suppliers on the proper use of the Healthcare Common Procedure Coding System (HCPCS) through product reviews and decisions.
• Conduct national pricing functions for DMEPOS services.
• Assist CMS with DMEPOS fee schedules.

DMEPOS Supplier Enrollment

Any DMEPOS Supplier that will be submitting claims to Medicare on the behalf of patients must obtain a Supplier Number by enrolling through the NSC - The National Supplier Clearinghouse. The Supplier Number may also be called a Supplier Authorization Number or a Medicare Supplier Number.

The NSC - National Supplier Clearinghouse - assigns the supplier numbers through an application process.

A HCFA 855S application must be completed and submitted to NSC. For more information on becoming a provider/supplier, obtaining a HCFA 855S application, or learning more about the Supplier Standards, contact the NSC at 1-866-238-9652.

> National Supplier Clearinghouse (NSC)
> P.O. Box 100142
> Columbia, SC 29202-3142
> Toll Free: (866) 238-9652
> www.palmettogba.com (select "other Medicare partners")

Approved providers/suppliers of DMEPOS are notified by letter of their National Supplier Identification Number assignment, a 10 digit number that must be used on all claims filed to the DMERC. NSC will also release new supplier numbers to the appropriate DMERCs so claims can be processed without delay. Please note: The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act of 1996 (HIPAA) mandated the adoption of standard unique identifiers for health care providers, as well as the adoption of standard unique identifiers for health plans. The purpose of these provisions is to improve the efficiency and effectiveness of the electronic transmission of health information. The Centers for Medicare and Medicaid Services (CMS) has developed the National Plan and Provider Enumeration System (NPPES) to assign these unique identifiers.

Filling Claims

DMEPOS Suppliers, both participating and non-participating, must submit claims for Medicare Part B/DMEPOS equipment electronically. Suppliers cannot charge patients a fee for completing/filling out these forms.

GEMCO Medical has included medical billing information in this catalog, as a service to our customers. The medical billing information is not a guarantee of payment or coverage. We cannot guarantee the accuracy of the information printed herein and are not responsible for claims or liabilities that may result from the use of this information. The medical billing information and coverage policies are frequently revised. Please review policies before submitting claims. No independent verification of the data is claimed or implied.

Fee Schedules can be obtained through the HCFA website www.hcfa.com.
